Re: Second Request for Supplemental Information, Little Cottonwood Granite Extraction Project,
S/035/017, Salt Lake County, Utah

Dear Mr. Nielsen:

On July 16, 1999 the Division sent a letter to you requesting supplemental information regarding the Little Cottonwood Granite operation. The additional information was requested within ten days of your receipt of that letter. It has now been more than 45 days since our first request was made. ***Please provide a response to this second request for information by the close of business on September 17, 1999.*** The supplemental information requested by the Division is described below:

1. An updated disturbed area map clearly outlining all current mining related disturbances. Please label and differentiate between existing and proposed disturbances, including any recent and/or proposed changes to the access roads and the permit area/safety fence boundary. Please identify and show the location of the support facilities (trailers, etc.) on this map as well.
2. A complete copy of the approved plan amendment which was recently filed with the county seeking their approval for a variance to conduct mining activities within the 1,000 foot residential building lot buffer zone (including any updated maps).
3. A copy of the most recent geotechnical stability report which is routinely being filed with the county. A copy of a current weekly or monthly summary would suffice.
4. A copy of the 1998 Annual Report of Mining Operations (Form MR-AR) for the project. Our records indicate we mailed a copy of the form to your offices on December 28, 1998. A second copy was telefaxed to your office on July 9, 1999.

The mining and operations report is required by State mining law (Utah Mined Land Reclamation Act, Title 40-8-15.2) and the Minerals rules (R647-3-116). All permitted mining

operations must file this report on or before January 31 of each year, describing the operations conducted during the preceding calendar year. An operator's failure to file this report in a timely manner may be considered a violation of the Act and Rules which could result in subsequent enforcement action by the Division.

Your cooperation in providing the requested information would be appreciated. Failure to respond to this request may be considered a violation of the Act and Rules which could result in issuance of a Notice of Noncompliance, or a Notice of Agency Action. If you have questions or concerns in this regard, please contact me at (801) 538-5286.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
Minerals Reclamation Program
